a. Accommodation for Labour will be provided by Power Mech near the work spot subjected to the area available at site.

b. Ensure that 24 hours working has to be carried out for completing the work within the schedule period.

17. SUBCONTRACTOR'S RESPONSIBILITY:

a. Staff, skilled / semi skilled/ un skilled manpower to complete the entire job up to the satisfaction of CUSTOMER.

B. Local conveyance of your workers& staff.

C. Day to day minor/Major medical expenditure of your workers.

D. All the labor norms and statutory requirements to be fulfilled as per the instructions of BHEL

18. SHORTCLOSING OF WORK ORDER:

CamScanner

If PMPL shall feel at any instance during the life of work order, that

i. The subcontractor is not performing up to the satisfaction of PMPL and is unresponsive to instructions, communications, notices from site in charge or Head office PMPL.

ii. The subcontractor is involved in any illegal acts in site or harming the performance of other agencies

iii. The subcontractor is gradually becoming threat in sense of creating unrest in site of any type.

iv. The subcontractor has become financially unsound to continue the expected performance

Then PMPL will be at full liberty to short close the work order with a written notice/email and the agency will immediately be active in withdrawing its resources and start demobilization completing its final billing procedures at site level.

15 GOVERNING LAW AND JURISDICTION & DISPUTE RESOLUTION:

15.1 This Agreement will be governed and interpreted by the laws of the Republic of India, and shall be subject to the exclusive jurisdiction of the Courts at Hyderabad.

15.2 All disputes, differences, controversies or claims arising out of relating to this Agreement or any breach thereof shall be referred to the sole arbitration of the arbitrator appointed by Power Mech. The award of arbitrator shall be binding upon the parties to the dispute.

15.3 The provisions of Arbitration and Conciliation Act 1996 (as amended from time to time) shall apply to the arbitration proceedings. The place of the arbitration shall be Hyderabad only. The arbitration proceedings shall be conducted in English language. The cost of arbitration shall be borne equally by parties. Work under the Subcontractor shall be continued during the arbitration proceedings All the disputes, differences, controversies or claims arising out of or relating to this Agreement or any breach thereof shall be subject to exclusive jurisdiction or civil court Hyderabad only

13. LIQUIDATED DAMAGE

On acceptance of this work order the subcontractor agrees that the scope of work ordered in this contract shall be commenced and carried out in line with time period requirement of M/S PMFL. Time stipulated in the work order must be deemed as the essence of this contract. In the event, the subcontractor fails in execution and completion of scope of work in the specified time period, the subcontractor will be liable to pay Liquidated Damage to PMPL.

For delayed completion of scope of work, Liquidated damage & not as penalty, an amount equal to 0.5 % of total work order per week subject to maximum of 10% of work order vale shall be deducted from amounts payable to subcontractor.

20. FORCE MAJEURE

If the contractor suffers delay in execution of contractual obligation due to reasons beyond control on account of natural disasters or civil movements, the agreed time of completion shall be extended appropriately without being eligible for any compensation.

In the event of necessity to pre close the contract due to inordinate delay in delivery of materials, items etc. PMPL has the discretion to do so by reducing the unexecuted portion of work, on mutual agreement.

21. REMARKS:

d. The supplier will be delivered minimum quantity 40,000.00 Cft from river site in every day.

中国水电建设集团国际工程有限公司
SINOHYDRO CORPORATION LIMITED

Supply Agreement for Local Sea Sand

For 4-Laning of Dhaka-Chittagong Highway Project

No: HIGHWAY PROJECT (3)/MW-043

This Agreement is signed on 21th Oct 2012.

53, Rose Queen, (3rd Floor) Farid Market Middle Azampur, Dhakkhinkhan, Dhaka-1230
Mobile - +8801718 259374,01775791122, E-mail: omienterprise9374@gmail.com

Between

Sinohydro Corporation Limited, Dha-Chi Highway Construction with its office at Circuit House Road, Feni, Bangladesh, represented by Mr. Peng Yunhe, the PM of Sinohydro Corporation Ltd. (Hereinafter referred to as the Party A)

And

M/s. **Omi Enterprise**, 53, Rose Queen, (3rd Floor) Farid Market Middle Azampur, Dhakkhinkhan, Dhaka-1230 the proprietor is Md. Abdur Rahim, the contract No. 01718 259374, (Hereinafter referred to as the Party B)

WHEREAS the Party A has awarded as the Contractor by Road & Highway Developments (hereinafter referred to as "the Engineer" for construction of 4-Laning of Dhaka-Chittagong Highway project (hereinafter referred to as *the Works*) ;

WHEREAS the Party A desires to procure specific and qualified sea sand (hereinafter referred to the "sand") from the designated stockyard at the right side of existing highway project (from Dhaka to Chittagong) subject to the terms and conditions of this Agreement; and the Party B is willing to provide the sand and enter into this Agreement with the Party A for the supply of the sand.

NOW THEREFORE IT IS HEREBY AGREED as follows:

1. Agreement Quantity and Amount

1.1. The estimated quantity of the goods under this Agreement is 1,500,000 cft. The unit price for the quantity shall be 5.5 TK per cft. The unit price for the quantity in addition to the 1,500,000 cubic meters stipulated in the Agreement, if any, shall be the same as this above price.

1.2. The unit price (5.5 TK per cft) stipulated in the Agreement shall be deemed as all inclusive rate, including but not limited to the cost for procurement and delivery of the sand to the designated stockyard, rent for stockyard, storage cost, loading cost, profit, overhead, excavator and excavator operator, all the taxes and fees to be charged by Bangladeshi government/organization in connection with all the activities under the Agreement.

CamScanner

1.3. The Party B shall select and rent one stockyard with an area of 10.000 square meters. The location of the stockyard shall be at the right side of 4-laning highway project near Sango Gas Plant area of Fozderhat subject to the approval of the Party A.

1.4. The Party A will arrange his own equipment at the designated stockyard for transportation of the sand to his construction site after sand.

1.5. The unit price will remain fixed during the Agreement period. No extra cost of escalation, fluctuation in any costs, charges and expenses whatsoever in respect of or in relation to execution of Agreement by Party B will be paid by the Party A.

1.6. The sand quantity shall be measured jointly by the representatives from Party A and Party B at the designated stockyard after loading and leveling of sand on the Party A's transportation tool.

1.7. The Party B shall complete all the preparatory works and make ready for the sand supply within 10 days immediately after the signature of the Agreement (after get the sea sand collection permission).

2. The Party B's Obligation

2.1. The Party B shall be deemed to have satisfied himself as to his capability to supply the sand and provide the specific/qualified material to the satisfaction of Party A and the Engineer in accordance with this Agreement.

2.2. The Party B shall be responsible for procuring, delivering, storing the sand at the stockyards and load the sand on the Party A's transportation by means of equipment as provided in the Agreement and bear all cost and expenses incurred and/or to be incurred by himself in connection with all his obligations under the Agreement. The Party B shall be responsible for safety & security of the Party A's transportation tool within the Party B's stockyard under the Agreement. The Party B shall guarantee the Party A's transportation free of obstruction.

2.3. The Party B shall be deemed to have satisfied himself of all the conditions and environment in connection with supplying the sand under this Agreement, no claim of whatever natures will be entertained due to lack of whatever kinds of knowledge.

3. The Party A's Obligation

3.1. The Party A shall provide equipments for transportation sand at the designated stockyards.

3.2. The Party A shall check and certify the quantity of the sand loaded & collected and make interim payments to the Party B under the Agreement.

4. Quality Requirement for the Goods

4.1. The sand under the Agreement shall be sea sand and has a portion passing the 0.075 mm sieve not greater than 20 percent. The sand shall meet the requirement for sand embankment as required in the Contract signed between the Party A and Roads and High Departments Bangladesh.

4.2. Brush, roots, rubbish, sods, weeds, logs, heavy vegetation or other organic or deleterious material shall be deemed unsuitable and shall not be loaded on the Party A's transportation tools. The Party B shall procure and delivery the sand in a skillful manner so as to avoid contamination of such harmful materials in the qualified sand. Otherwise, the Party A shall be entitled to reject the contaminated sand.

5. MEASUREMENT AND PAYMENT

5.1. The sand will be measured mutually on truck basis after uniformly leveled at Party A's transportation tool.

5.2. The quantity mutually measured, shall be recorded and signed by the representatives from both parties in agreed form and be considered as the actual and correct quantity of the sand, which shall be used as the basis of payment.

5.3. Interim Payment shall be made by the Party A for the sand delivered by the Party B, provided always that the accumulated cost of the accepted sand shall not be less than TK. 1,000,000 (One million Taka) as measured by the Party A.

5.4. No interim Payment shall be made for a sum less than TK. 1,000,000 (one million Taka only) . Such payment shall be made by Accounts Payee Cheques in the Currency of Bangladesh (Taka) 7 days immediately after receipt from the Party B of an interim payment application which shall enclose all relevant substantiation including Delivery Receipts duly confirmed by the Party A's representative at site.

6 Deduction Money

CamScanner

6.1 If any sand supplied by the Party B is unqualified and/or rejected by the Engineer prior to incorporation of permanent road construction, the relevant cost for such unqualified and/or rejected materials shall be deducted from the next payment due to Party B.

7. Validity

7.1. This Agreement will come into effect after countersigning by both parties.

7.2. This Agreement shall expire upon the whole specific and qualified quantity as specified in the Agreement has been provided by Party B and collected by Party A and all the relevant matters have been settled accordingly.

8. Termination

8.1. If the Party B fails to execute the Agreement as aforesaid or required by the Party A or if it becomes apparent that in the Party A's opinion the Party B fails to fulfill the requirements of this Agreement and after 10 days upon receipt of the Party A's notice in writing to improve or increase, the Party B still fails to execute the Agreement as per the requirement, then the Party A shall be entitled to terminate this Agreement by giving seven (7) days prior Notice to the Party B. Only specific and qualified materials will be payable according to the Agreement. Provided that the Agreement is terminated due to the Party B's failure, the Party A is entitled to deduct the 1,000,000 TK (one million TK only) from any amount due to the Party B for compensation of the Party A's loss.

8.2. The Party A will be responsible for getting the sand collection permission from concerned authority.

9. Permission for Collection

9.1. Upon failure of getting the approval for sand collection from the concerned authority, the agreement shall be deemed as invalid.

10. Settlement of Dispute

10.1. The parties in this Agreement agree that all questions, disputes, and matters which arise between the parties regarding any aspect of this Agreement may be settled amicably, failing which the same shall be referred to a mutually accepted person by both parties who shall act as sole arbitrator. The adjudication of the arbitration shall be final and binding on the Parties. The arbitration proceeding shall be held in Dhaka, Bangladesh.

CamScanner

11. Others

11.1. In witness whereof, the parties in free mind and will, without being influenced by any body have subscribed and set their respective hands to this Agreement on the day/month/year mentioned above.

- Equipped with an open circuit high efficiency swash plate piston pump
- Sufficient capacity of hydraulic filters keep hydraulic oil clean
- The pre-cleaner designed for a long life of the engine supplys not-polluted-air even in the job site full of dust

M/S Omi Enterrprise

Pile Driving Formula:

$$\frac{E}{S + C}$$

Where:

R= Resistance of Soil (Ton)

W= Weight of the Hammer (Ton)

H= Height of Fall (inch)

S= Pile penetration Per Blow (inch)

C= Empirical Constant

Pile Capacity:

Note:

C =0.1 for Stream Hammer

C =1.0 for Drop Hammer

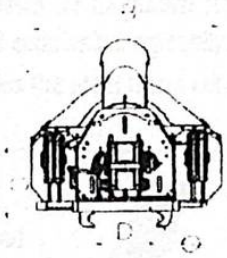

$$R = \frac{W \times H}{S + C}$$

M/S Omi Enterrprise

Awaring necessity of architecture and civil engineering, we studied for many years to improve architectural technique and produce new-fashioned post of steel-tube, scaffold of steel-tube and other accessories which will accord with International standard and be economical, safe and convenient.

MERITS :

1. It can be operated easily according to the actual situation.
2. Special structure, Easy to assemble and part.
3. Volume is not so big. Easy to store, remove and maintain.
4. Strong tension. It can be assembled firmly.
5. Well treated on surface. Rustproof. Beautiful and high class.

STEEL "TUBE AND CLAMP" SCAFOLD

M/S MASUD ENTERPRISE **Steel Scaffold** is well known for its tubular steel Frame type scaffold, but its **STEEL "TUBE** and **CLAMP"** scaffolding is also convenient and economical especially suited on the uneven ground level

M/S MASUD ENTERPRISE **STEEL SCAFFOLD** supplies the steel tubes cut to convenient length such as 1 m, 1.5 m, 2.0 m, 3.0m, 4.0 m, 5.0 m, 6.0 m long.

A. EXPANDING JOINT PIN- (40x40 mm.) For quick end to end connection of two 40 mm. NB tubes only in compressing and not in bending.

B. BASE PLATE - 150 x 150 mm. Base plate provides flat bearing surface for even load distribution. Base plates are supplied to suit 48.3 mm or 60.3 mm. OD tubes & verticals with spigots.

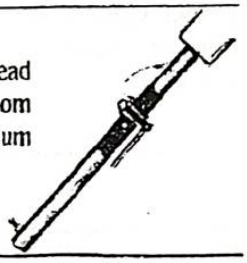

C. ADJUSTABLE BASE/HEAD PLATE - Acme threaded screw of 225 mm length with captive nut, welded to 150x150 mm. plate allows adjustment at bottom or top of scaffolding. Supplied to suit 48.3 mm. or 60.3 mm. OD tubes and verticals with spigots.

D. ADJUSTABLE STIRRUP HEAD - 'U' head welded to Acme threaded screw with captive nut allows for 225 mm. adjustment. Inside clear dimensions of 'U' head are 110 mm. wide and 84 mm. deep. Supplied to suit 60.3 mm. & 48.3 mm. OD verticals having capacity of 45 KN and 30 KN respectively.

E. PROPEX - A mini Prop with 'U' head provides adjustable support from 600 to 900 mm. height. Maximum working load : 30 KN.

F. CASTOR WHEEL - Fitted into scaffold tube vertical to make mobile scaffold. Maximum working load : 500 kgs.

G. STAIRCASE COUPLER - Fits on scafold tube and supports treads of stairs. Supplied in pairs (R & L).

H. BRACING CLAMP - For bracing of Prop Inner with 40 mm. NB tube (not to be used for load bearing connection.)

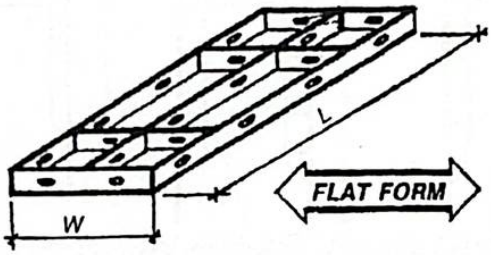

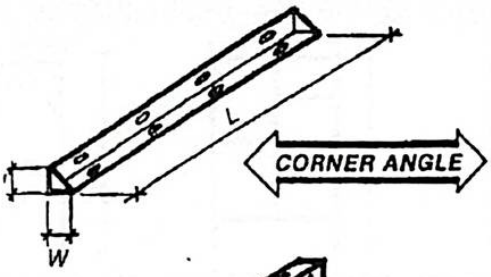

I. ADJUSTABLE JACK - Adjustable Jack can be used at top or bottom of vertical and provides 500 mm. adjustment. Available for use with 60.3 mm. or 48.3 mm. OD verticals with safe load 60 KN and 40 KN respectively.

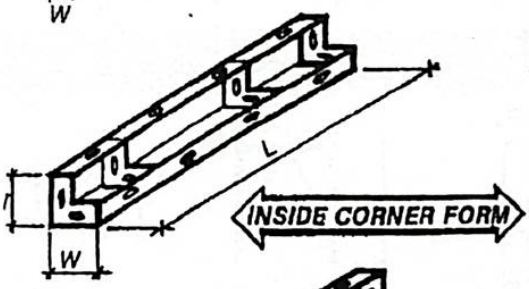

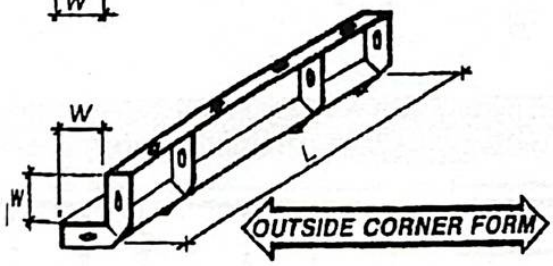

CamScanner

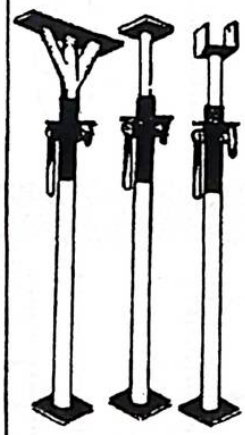

METAL FORM

TELESCOPIC STEEL PROPS (STANDARD DUTY)

Props made of Steel Tubes of outside diameter 60.3mm & 483mm and are available with Flat Square Top. U Head & Beam Head in following sizes :

Prop	Height-M		Safe Axial Load-Kg	
	Closed	Extended	Closed	Extended
AM-0	1.10	1.75	3500	3000
AM-1	1.50	2.75	3200	2300

ADJUSTABLE BEAM SPANS

These spans are suitable for providing supports for shutterings & can be used to economise on the requirement of individual props. These spans are of telescopic construction and consist of an outer & an inner member. Three size of each inner & outer members are available thus giving a combination of six types with spans adjustable as given below:

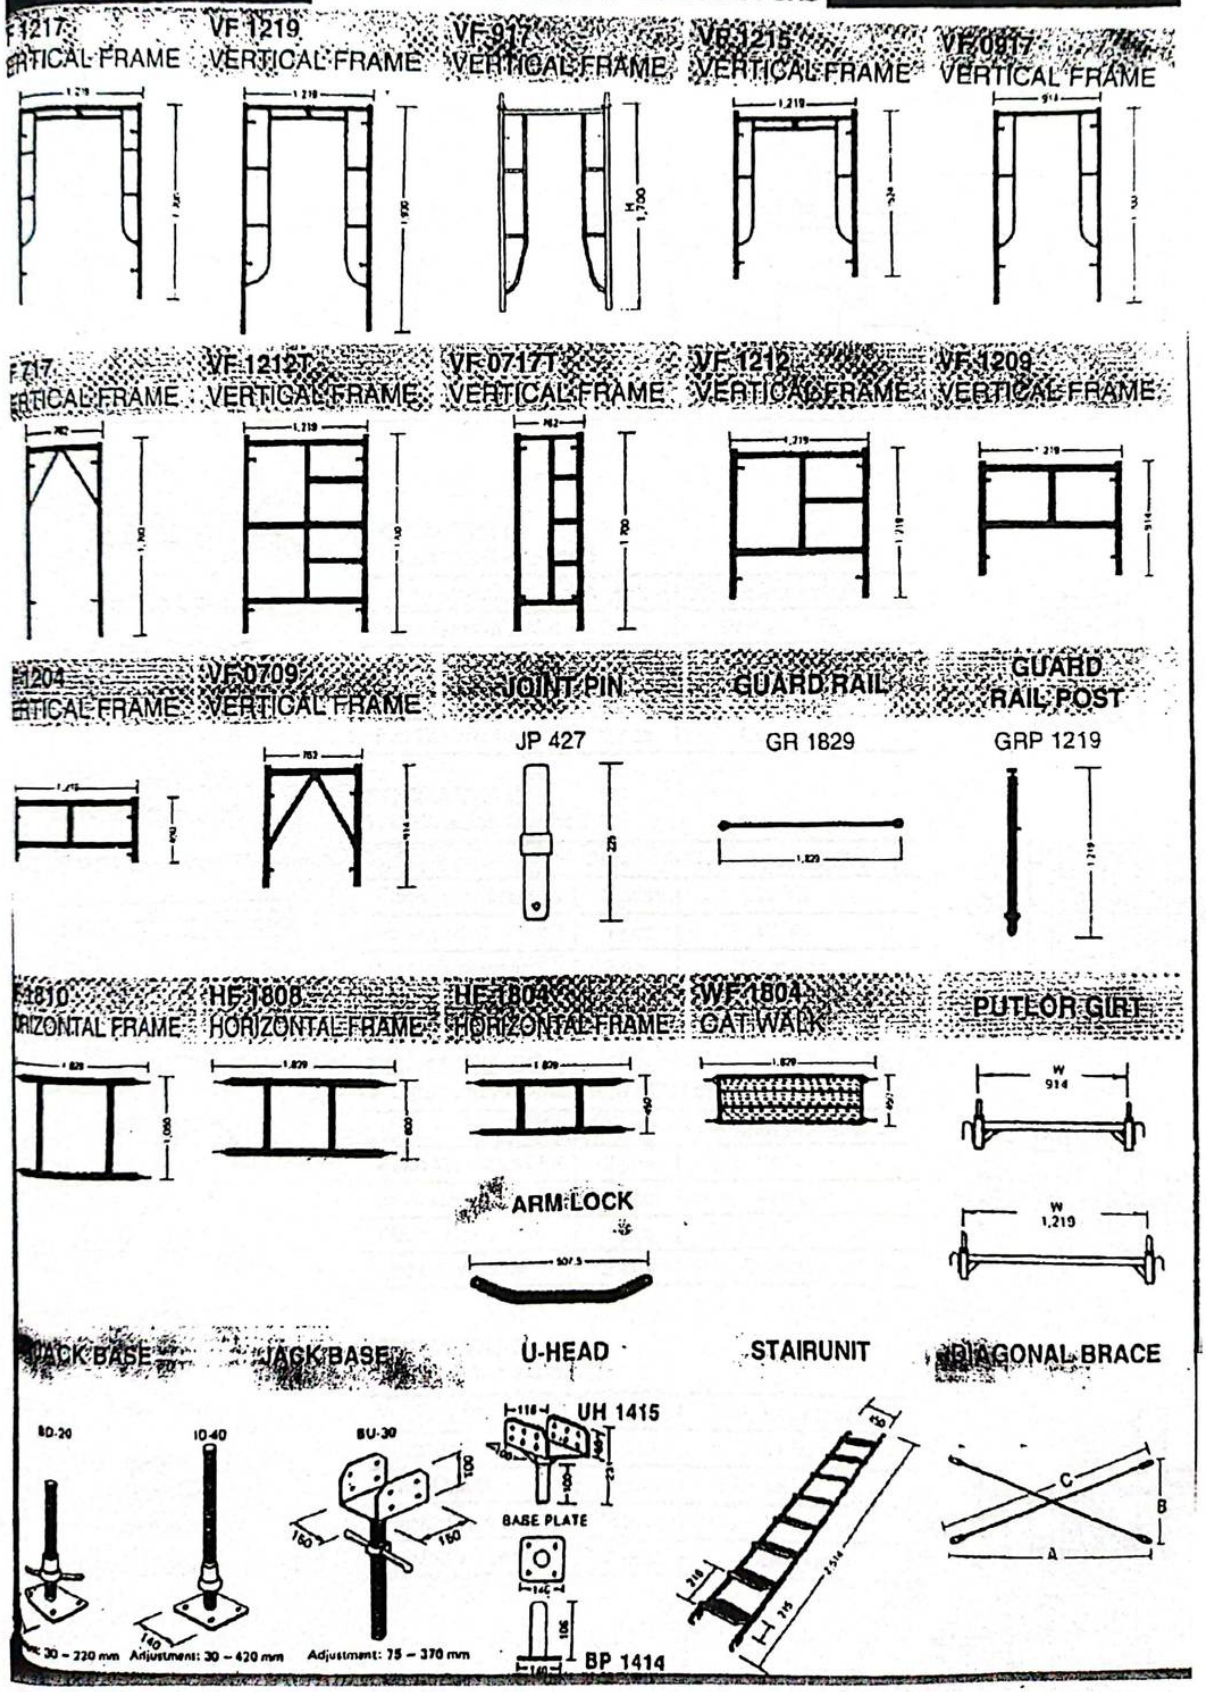

Set No.	(Clear span (M)	
	Maximum	Minimum
1.	2.71	1.76

COMPONENTS OF ASSEMBLING

1. **Wooden planks -**
   Clean site and lay the wooden planks at the ground at the ground in horizontal position.
2. **Jack base -**
   It is a base seat for adjusting and fixing the required scaffolding length above the wooden planks.
3. **Main frame -**
   Insert the main frame into jack base section in per pendicular position.
4. **Cross brace -**
   For fixing the main frame in each span of scaffolding.
5. **Arm lock -**
   It is a joining part of high rising and staging.
6. **Joint pin -**
   Insert into the top of main frame for joining the required dimension.
7. **Horizontal frame or catwalk -**
   It is a lateral pipe frames used for fixing the main frame to complete the first floor scaffolding. (It can be erected with about 2 to 4 spans in each high rising floor alternately.)
8. **Wall tie (Keeper joint)**
   Use wall tie to pervent the frames from swaying down due to strong wind and unstable ground. Fasted the ties to walls every four (4) span horizontally and every four (4) frame, vertically

Note :- Fix the open-end frames firmly at their conners using joint after assembled.

RECOMMENDED SAFETY RULES.

1. **FOUNDATION** Provide adequate sills on planks to spread the load on soft ground and use Adjustable base plate.
2. **VERTICAL FRAME** (2.1) Make sure that all Vertical frames are plumb and level at all times. Do not force Diagonal braces to fit. (2.2) Use Joint Pin to join Vertical frames. (2.3) Check secure locks of every Joint Pin of Vertical feames.
3. **WALKING FRAME OR WALKING PANEL** Ues Horizontol frame or steel planking at bottom, top and every 5 Vertical frame - high at least.
4. **CROSS BRACE** (4.1) Fasten all Cross Brace securely. (4.2) Never climb on Cross Brace.
5. **TRUSS FRAME** Place Truss support when using Truss Frame.
6. **WALL** - Tie (Keeper Joint) On wall scaffolding, place wall- tie securely to structure at least every 8 m. of Length and 6 m. of height.
7. **LOAD** Never overload any scaffolding at any time.
8. **IMPORTANT** Always keep equipments in perfect condition and never use even slightly damaged materials.
